

POMI

BALE ACCUMULATOR

- Baling and collecting in one work.***
- Makes windrows ACROSS the field.***
- Use ably for both grass and straw.***
- Cut 50% of the collecting time.***

Bale Accumulator

- In order to gather bales on the field, the Bale Accumulator is hitched to a press.
- The Bale Accumulator gathers all types of bales.
- Use ably for both grass and straw.
- The bale accumulator automatically shifts the bales.
- The bale accumulator unloads automatically or manually as desired.
- Weight is an option.

Advantages:

- It will halve the time for picking up bales, making it faster to gather the straw in case of rain.
- Avoids transport across the field.
- Are quick to get in transport position for road.

Length	3200 mm
Width during transport	2970 mm
Weidth in field - minibigbale	4450 mm
Weidth in field - bigbale	3920 mm
Weight	980 kg
Wheels	26x12.0012/4
Max load	2400 kg
Max length on bale´s	2600 mm
